Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 22 November 2004.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.

DETAILED ACTION

1. The RCE that filed on 11/22/04 is acknowledged.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

3. Claims 1, 6, 14 and 17-18 are rejected under 35 U.S.C. 102(e) as being anticipated by Dyott (6,539,134).

Regarding claim 14, Dyott, figure 2, discloses an optical fiber with reduced effects of linear birefringence, comprising a length of optical fiber (12), the fiber comprising a twist (14) separating the fiber into a plurality of fiber sections and the twist is formed by heating the fiber (column 5, lines 29-34).

Regarding claim 17, the optical fiber is a circular-cored single-mode fiber.

Regarding claim 18, an orientation of the fiber is maintained along the plurality of sections separated by the twist.

Regarding claims 1 and 6, the features in the method claims are identical to those in the apparatus claims. Therefore, the method of reducing the effect of linear birefringence in an optical fiber alone is not a patentable feature.

Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claims 2-5, 7-11, 13, 15-16 and 19-21 are rejected under 35 U.S.C. 103(a) as being unpatentable over Dyott (6,539,134).

Regarding claims 15-16 and 19-21, Dyott discloses the instant claimed invention as described above except for the twist angle between sections is substantially or equal 90 degrees.

It would have been obvious to one of ordinary skill in the art at the time the invention was made to provide Dyott to have the twist angle between sections is substantially or equal 90 degrees, since it has been held that where the general conditions of a claim are disclosed in the prior art, discovering the optimum or workable range involves only routine skill in the art. In re Aller, 105 USPQ 233, for better twisting.

Regarding claims 2-5, 7-11 and 13, the features in the method claims are identical to those in the apparatus claims. Therefore, the method of reducing the effect of linear birefringence in an optical fiber alone is not a patentable feature.

Response to Arguments

6. Applicant's arguments with respect to claims 1-21 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Thanh-Tam T. Le whose telephone number is 571-272-2094. The examiner can normally be reached on 7:30-5:00.
